Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Murray (USPG Pub No. 2007/0175054).

Regarding claim 1, Murray discloses an optical marking device having at least one light source (16) (see figure 1, paragraph 0023), and having means for generating a first optical projection line on a reference face (paragraph 0024), as well as means for generating a second optical projection line on the same reference face (paragraphs 0024, 0059), and the second

optical projection line forms an angle of 90° with the first projection line (paragraph 0059), characterized in that means are present which generate a third projection line (paragraphs 0058-0059), and the third projection line assumes an angle of 45° to the first optical projection line and an angle of 45° to the second optical projection line (paragraphs 0058-0059).

Regarding claim 2, Murray discloses the first, second, and third projection lines define a plane (see figure 19, paragraph 0059).

Regarding claim 3, Murray discloses the third projection line is an optical projection line (paragraphs 0023, 0058-0059).

Regarding claim 4, Murray discloses that at least one projection line is fanned out perpendicular to the reference plane (paragraphs 0028, 0058-0061).

Regarding claim 5, Murray discloses that the three optical projection lines are generated by at least one light source (16) (paragraph 0059), and in particular by at least one linear laser (paragraphs 0024, 0039).

Regarding claim 6, Murray discloses that the three optical projection lines are generatable by means of a single light source (16), and in particular by means of a single laser signal (paragraph 0059).

Regarding claim 7, Murray discloses that the optical projection lines are generatable by means of at least one optical element (88) from the single light source (16) (paragraphs 0039, 0059).

Regarding claim 8, Murray discloses a tool device (10) having a device as defined by one of claims 1 through 7 (see figure 1, paragraph 0023).

Regarding claim 9, Murray discloses that the device is suspended in the manner of a pendulum laser in a housing (12) of the tool device (10) (paragraph 0045).

Regarding claim 10, Murray discloses that the device is calibratable relative to the housing (12) of the tool device (10) (paragraphs 0042-0043).

Regarding claim 11, Murray discloses that the emission from the optical projection lines is switchable out of the housing (12) of the tool device (10), and in particular is individually switchable (see figure 2, paragraphs 0038-0040, 0058-0059).

Prior Art Citations

Hayes et al. (USPG Pub No. 2006/0137195), Chang et al. (USPG Pub No. 2004/0177523) are each being cited herein to show an optical marking device that would have read on or made obvious a number of the above rejected claims, however, such rejections would have been repetitive.

Response to Arguments

Applicant's arguments filed 06/26/08 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., *simultaneous* production of three projections) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
